PROFESSIONAL TURFGRASS

FAIRWAY SUPREME
— PREMIUM —
PERENNIAL RYEGRASS BLEND

PLANTING SPECIFICATIONS

PLANTING RATE:
New Lawns/Southern Overseeding:
10 lbs./1,000 sq. ft.

This package covers:
5,000 sq. ft. New Lawns/Southern Overseeding

Planting Depth: ½" to ¾"
Germination Time: 7-21 Days
Traffic Tolerance: Excellent
Sun Tolerance: Good
Shade Tolerance: Good to Moderate
Drought Tolerance: Moderate
Recommended Mowing Height: 2"

SETTINGS FOR COMMONLY USED SPREADERS	
Spreader	Rotary Drop Spreader
Republic EX Drop Spreader	30
Republic EX Broadcast Spreader	1000
Scotts AccuGreen Drop Spreader	11
Scotts SpreadEasy	20*
Scotts SpreadGreen Broadcast Spreader	1400

*Drop Mfor

ADDITIONAL TIPS

- Conduct a soil test to determine pH level and add soil amendments accordingly for optimal lawn development.
- Begin mowing once turf reaches one-third taller than desired mowing height.
- Do not apply weed control herbicides until after the third mowing.
- Once turf is established (6–8 weeks after planting), begin an annual fertilization maintenance program.

BEST TIME TO PLANT SEED

- The best time to plant grass seed is in early Spring or early Fall.
- Grass seed germinates and establishes best when average daily temperatures are between 60° F and 70° F.

PLANTING INSTRUCTIONS

4 Easy Steps to Planting Seed

1. PREPARE THE SOIL

Bare Spots and New Lawns
- Remove all debris from planting area.
- Till or rake to loosen top 2" to 3" of soil.
- Rake smooth to create a flat, level planting area.

Overseeding and Thin Areas
- Mow the lawn as short as possible & remove clippings.
- Rake thoroughly removing thatch (dead grass) and debris to expose the soil.
- Aerate lawn if possible to allow better air and water penetration into the soil.

2. FERTILIZE PLANTING AREA
- Apply a starter fertilizer at the manufacturer's recommended rate.
- Lime may need to be added in some areas to ensure proper soil pH levels.

3. PLANT THE SEED
- Using a drop-type, rotary or hand held spreader, apply the seed evenly to avoid skips, overlapping & streaking.
- Gently rake, working seed into soil about ¼".

4. WATER SEEDED AREA
- Water daily to keep soil moist.
- Do not allow the top ½" of the soil to become dry until seedlings have completely emerged.
- Once grass becomes established, reduce watering to ½" twice a week.

PENNINGTON GUARANTEE

If you, the consumer, are not satisfied with this product after use in accordance with packaging instructions, you may be eligible for a refund. Send original receipt, empty packaging and a brief explanation within sixty days of purchase. Upon verification, we will send you a refund check for the purchase price.

NOTICE: Arbitration/conciliation/mediation required by several states. Under the seed laws of several states, arbitration, mediation, or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed to which this notice is attached to produce as represented. The consumer shall file a complaint (known for FL, AL, MS, MT, SC), TX, WA, against only (AR, OK, ID, MD, IL) along with the required filing fee (where applicable) with the commissioner/secretary of agriculture, seed commissioner (IN), or other agricultural officer within such a time as to permit inspection of the crop, plants, or trees by the designated agency and the landowner from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statutes.

ESPECIFICACIONES DE SIEMBRA

DOSIS DE SIEMBRA:
Césped Nuevo y Sobre-Siembra en el Sur: 10 lbs./1,000 pies cuadrados

El paquete cubre:
5,000 pies cuadrados césped nuevo y sobre-siembra en el sur

Profundidad de Siembra: ½" - ¾"
Tiempo de Germinación: 7-21 días
Tolerancia al Tráfico: Excelente
Tolerancia al Sol: Buena
Tolerancia a la Sombra: Mediana
Tolerancia a la Sequía: Buena – Moderada
Se Recomienda Cortar a la Altura de: 2"

INSTRUCCIONES DE SIEMBRA

4 Pasos Fáciles para Plantar Semilla

1. Preparar la Tierra

Áreas Descubiertas y Césped Nuevo
- Remueva todo el desecho del área que va a sembrar.
- Rastrille para aflojar de 2" a 3" de la cubierta de la tierra.
- Rastrille suavemente para crear una área de siembra nivelada y pareja.

Para Sobre-Sembra y Áreas Ralas
- Corte el césped lo bastante lo más corta posible y remueva todo lo cortado.
- Rastrille profundamente para remover todo el césped seco y desechos para exponer la tierra.
- Si es posible airee el césped para permitir la penetración de aire y agua a la tierra.

2. Fertilización
- Aplique un fertilizante de inicio usando las indicas recomendados por el fabricante para buenos resultados.
- En algunas regiones es necesario utilizar Cal para balancear el nivel de pH en la tierra.

3. Sembrar la Semilla
- Use una propagadora de mano, rotaria o tipo-riega, aplique la semilla de modo uniforme sobre las indicas recomendadas, para evitar áreas sin semilla, áreas con sobre-siembra o áreas manchadas.
- Rastrille suavemente el área sembrada para que la semilla quede a una profundidad de la tierra de ¼".

4. Regar el Área Sembrada
- Riegue diariamente para mantener la tierra húmeda.
- No permita que ½" de la superficie de la tierra se seque hasta que las plantas hayan emergido completamente.
- Una vez que el césped se haya establecido reduzca el agua a ½" dos veces por semana.
